

FIRE FIGHTER

NEW!

The right prevention for your security

The flame inhibitor **Firefighter** is unique: super effective, practical, very light, portable, ecological.

It is a manual dispenser of potassium aerosol, the result of the **last generation technology to extinguish the beginning of fires** with a strong **extinguishing capacity, innocuous and ecocompatible** which does not leave any residuals. Easy to use, it does not require any maintenance, it has no expiration date and it is always ready to be used thanks to its **unique and effective** ignition patent.

Very small and unbeatable in effectiveness, **Firefighter** is perfect to keep at home or in the car. Its sizes are those of a cylinder with a diameter of about 3,5 cm and a length of 33 cm and a weight of only 350 gr, like a travelling umbrella.

But its action is absolutely amazing: during its erogation it produces a powerful jet of potassium aerosol of a 100" duration instead of 6" of the usual fire-extinguishers of small sizes and 20/30" of those with 10 kg powder.

Only **Firefighter** grants you 100 seconds which become of great importance in case of danger, 100 seconds to control flames, **100 seconds to prevent the most irreparable events.**

RINA homologation FPE 530304 CS
Extinguishing Class A-13B-C

advantages:

- **Fireproof technology, used in space**
- **Practical, light, easy to use, always ready to use**
- **No need of recharge or maintenance, product without expiration date**
- **Compatible with the environment, it does not leave dirty traces or residues**
- **It works active for more than 100 seconds**

5 years guaranteed
